JUSTICE AND RIGHT

VOLUME FIFTY TWO

Says WILL ROGERS

BEVERLY HILLS.—Well all I know is just what little I read in the papers. Somebody just sent me a clipping I see here and it says who has been left off and who added to the Social Register. Now that's a laugh ain't it? (I would be dropped if I ever got on for saying "Ain't"). Of all the undemocratic things you can think of just off hand, that is the prize "Housey," a book to tell you who is a good Parlour-Hound and who is a sort of a Mewset around the tea table.

I see just off hand here that Polly Lauder, (a niece of Harry Lauder) who married Gene Tunney has been dropped from the "Register." If she had married a Society Queen—she would have made the grade but when she married Gene, a man who had been a pretty fair type of Gentleman who's only fault in his profession was that he shook hands with you before knowing you Cuckoo, why they right away said that Polly didn't grade up to par. She had been negligent in picking a May-flower weed—Tunney's name never had been in "Baloney sheet." But it had to tell in there who she had "promised to Love honor and break clean in the clinches with," so in that way it had to name Gene. So in a kind of a back alley way his name was in there, not intentionally but in there. So I guess that why they had to drop Pollys. They left her in there for one year to see if she would repent and come back to Cocktail cavalcade, but as she didn't why they just got themselves a great big eraser and she dropped in Social oblivion. And I bet that just about broke that girls heart. For here she had spent a lifetime picking out parents who were eligible, and now she had gone and flopped after working hard to make the grade, and here at the last minute funk. Now what can she do, where can she go? Decent people won't have anything to do with her. Everybody will look at her and say, "Why that's Polly Lauder. She used to be somebody and was fine and social, but they dropped her right off the Boat and here she is practically Destitute of all the other members of the great Fraternity of those who are somebody by grace of proper propagation, (and ordering enough books).

All of which gets us back to "What is Society and what is a Gentleman?" Well of course its easy to define a gentleman, a gentleman is to my way of thinking a man that can play golf and don't say so. But as there is so few in fact it has been discussed whether there is any at all.

Now as to "What is Society." Society is any band of folks that kinder throw in with each other, and mess around together for each others discomfort. Any little or big group of folks that sort of flock together are "Society" in some form or other. The ones with the more money have more to eat and drink at their affairs, and their clothes cost more, and so those called "High Society." Now the morals or personal behavior of its Members have nothing to do with it. The often they crash the front page the soldier they are in their fraternity. And its sort of hereditary. No matter who you raise up in your family Zoo why they naturally inherit your space in the "Social Register." Your personal accomplishments have nothing to do with it. So for downright amusement in reading matter that Register will compete with the Congressional Register and College Humor.

Kinder thought Mr. Coolidge would have to get round to criticism.

It's fine to just keep saying everything is great, but about the only way to prove it to people is for things to be great.

Even our old family doctor can't fool us. We are the one that's got the stomach and we know whether it's hurting or not. So Calvin hopped on the Farm Board in his "Sorority." The poor farmer can't get a break. Just when it looked like he would be able to sell his land for rent golf courses—somehow invents golf that you can play in the kitchen sink!

Oklahoma and Texas have an original primary system.

They have so many seeking office that the first primary is only to find out how many are destined of living off the State.

The second primary is to eliminate 50 per cent of these.

The third is to get rid of half of what is left.

The fourth is to eliminate any good man that might have crept in by mistake.

Now, you have just politicians, so the fifth one is to live in two worlds ones, and they run it off.

NORTH BRANCH SORRY TO LOSE BURNS

Thru the courtesy of the editor of the North Branch Gazette we are in receipt of a copy of their June 20th edition which has the following to say of Supt. R. R. Burns and family:

R. R. Burns, who for the past ten years, has successfully filled the post of superintendent of the local public schools, has tendered his resignation, to accept a similar position in the schools at Grayling.

Since coming here to head the local faculty in the fall of 1920, Mr. Burns' abilities as faculty supervisor, class room instructor and general disciplinarian have been evidenced by the resulting cooperation, live school spirit and academic progress in all departments.

I see just off hand here that Polly Lauder, (a niece of Harry Lauder) who married Gene Tunney has been dropped from the "Register." On the night of the 23rd a full fell over the vicinity; the air became heavy, then a distant rumble like that of thunder. The earth moved in a wave-like motion. The street lights reminded one of swaying torches; a soft crushing sound of the crumbling masonry filled the air.

Her first thought was to get back to her hotel, but the location completely left her mind. Plaster and dust sifted from the brick buildings as the people rushed about screaming from those injured by the collapse of weakened walls, added to the near panic.

Friends of this vicinity deeply regret their departure, terminating such a long period of pleasant association. Hosts of well-wishers for their prosperity will follow them to their new home.

R. R. BURNS AND FAMILY LEAVE FOR NEW HOME

Aug. 8—Mr. and Mrs. R. R. Burns and two little daughters, Corrine and Leatrice Ann, left Tuesday morning to take up permanent residence in Grayling where, in early September, Mr. Burns will begin his duties as superintendent of public schools.

In July Mr. Burns returned from Camp Custer, where he had served for two weeks in an official capacity during the period of Citizens' Military Training there, having received the commission of First Lieutenant in the organized Reserves, 340th Inf., in the year 1918. During his time spent at the training camp, Mrs.

Burns will begin his duties as super-

intendent of public schools.

MATILDA FOLEY-BISHOP BRAVES QUAKE IN ITALY

(Special to the Avalanche)

Naples, July 28, 1930—Mrs. Bishop,

who is touring in Europe, tells of

thrilling experience in the earthquake

areas of South Central Italy.

On the night of the 23rd a full fell over the vicinity; the air became heavy, then a distant rumble like that of thunder. The earth moved in a wave-like motion. The street lights reminded one of swaying torches; a soft crushing sound of the crumbling masonry filled the air.

Her first thought was to get back to her hotel, but the location completely left her mind. Plaster and dust sifted from the brick buildings as the people rushed about screaming from those injured by the collapse of weakened walls, added to the near panic.

She was actually frozen with fear.

The forty-five minutes of the quake

seemed like hours. In reality it was

a very brief shake-up and now that it

is all over she doesn't mind the ex-

She left for Rome the next morning

BRUCKER TALKS TO GRAYLING VOTERS

Wilber M. Brucker, attorney general and candidate for governor spoke to a small audience at the band stand here last Friday afternoon. Mr. Brucker was introduced by T. W. Hanson.

He spoke of several of the issues of the present gubernatorial campaign among which was the "gas tax." This, he stated, was the best and fairest plan for helping to keep up the highway fund of the state. By the present system of 3¢ tax per gallon of gasoline it bret a revenue that made it possible to have funds for building and keeping up the highways of the state. By the gas tax all those

plan for helping to keep up the highway fund of the state. By the present system of 3¢ tax per gallon of gasoline it bret a revenue that made it possible to have funds for building and keeping up the highways of the state. By the gas tax all those

who travelled the highways were taxed in accordance with the extent of their travels. This applies to those who come here from other states, who travel elsewhere. When the

gas tax was proposed by Gov. Grossbeck who later became a law.

On the matter of highways he said that he favored the building up of the rural districts and was not in favor of allowing the metropolitan districts to hog it all just because the traffic happens to be heavier in certain sections such as Detroit and the area reaching to Pontiac, Flint and other heavily populated communities.

While these places should receive an equitable share of the highway funds still the rural districts where areas were just as large but valuations smaller should be provided with good highways. Mr. Brucker's trip from Kalkaska to Grayling was an eye-opener to him to realize that it was the State's Worst Highway.

A distance of 29 miles that cannot be travelled in less than an hour with safety is a highway that is no credit to the state.

Mr. Brucker stated that he was not a wealthy man and could not afford to buy a governorship and that in case he was elected that he would be free from obligation to anyone or any faction.

His next speaking stops were at

Lake City and Cadillac.

BRUCKER REALIZES NEED FOR ROAD IMPROVEMENT

Touring the state on a fast schedule by automobile has made Attorney General Wilber M. Brucker a more ardent advocate for good roads than ever.

On a recent tour of the northern part of the state he encountered two stretches of trunk line road which left indelible impressions on his mind.

The section of M-33, from Mio to Atlanta, where construction work now is being done resulted in his failure to keep a speaking engagement in Atlanta. His automobile became stuck in the heavy sand, requiring a team of horses to pull it out of the sand.

The following day he had to cut Kalkaska off his speaking schedule because of the condition of M-76 from Kalkaska to Grayling. Brucker's tour manager had routed him through Kalkaska to Grayling, with a speech at Grayling on the return trip. The schedule called for traveling the 25 miles in 30 minutes. As those familiar with the road know, the trip takes more than one hour, so he was forced to cancel the Kalkaska engagement to avoid the return trip.

ASPHALT CREW MAKES FINE PROGRESS ON US 27

During the past few months a continuous road building program has been in progress on trunkline U. S. 27. The evolution of the former gravel road to the present high speed route is the result of the road activities of the State Highway Department since the first of May.

The route has been improved by the construction of nine and one half miles of asphalt from the Crawford County line north of Roscommon to

Grayling. Besides this approximate-

ly two miles of asphalt have been

laid north of Grayling on the road to Frederic. This makes a total of

nearly eleven and one half miles of asphalt laid by the Grayling plant in three and one half months.

This has been a busy summer in road activities. James W. Perkins, Superintendent, and his crew of men, are now completing the seven mile stretch from Grayling to Frederic.

By the end of the season Grayling will also have four miles of up-to-date motor highway to the Military camp on M-93, that is if the progress planned by the State Highway Department is successfully carried out.

The engineers of the department have completed the preliminary survey to the camp.

This fine asphalt road is evidence of the fine supervision of the Grayling plant by Superintendent James W. Perkins. Commendation is due Mr. Perkins for his excellent work.

Through the splendid cooperation of his men, we have this fine stretch of asphalt pavement.

A pleasing view along the highway is as important to the traveler as the smooth,surfacing material to the

beauty of the trunk line by cutting down banks and obstructions and grading and building the shoulder ditches. Some work has been accom-

plished but there still remains a great deal of this work to be done. Such

work is supervised by the State High-

way Department under supervision of Harold Cliff.

The city as a whole can be justly

For Office of Secretary Of State

The Northern Michigan Road Com-

mmissioners Association, comprising a

group of county officials entrusted

with the road building and mainten-

ance problems in 25 of the counties

in the upper part of the lower penin-

sula of Michigan, met in annual con-

vention at Cheboygan on Wednesday

and Thursday August 6th and 7th,

resulting in the largest attended and

most enthusiastic meeting ever held

by the association. Interest was keen

throughout the meetings and much

business intended to further the in-

terests of road building and mainte-

nance in northern Michigan was

brought to the attention of the meet-

ing. Convention was attended by

State Highway Commissioner Billi-

man, District Engineer Burridge and

several other men primarily identi-

fied with state road matters, besides

full delegations from every county in

the district as well as others inter-

ested in the forthcoming road build-

ing and upkeep.

At the annual election of officers

for another year, the following selec-

tions were made:

President—Chas. A. Francis, of

Arenac county.

Vice President—Amos Buck, of

Roscommon county.

Secretary—George S. Stout, of

Muskegon county.

Treasurer—Sidney Modlie, of An-

trim county.

Two subjects of state wide inter-

est and concern were brought before

the meeting and acted upon. The

first was a resolution endorsing the

work being done by the Bureau of

Highway Education, an organization

formed outside of the state highway

department, and outside of road asso-

ciations, to carry on a campaign of

education that will acquaint the peo-

ple of the state with the danger of

acts intended to divert portions of

the gas-tax to other uses than build-

ing and maintaining trunk line roads.

The Bureau has been functioning

splendidly, spreading the gospel of

payment. Ben King has written for

our present good roads program and us

a little poem with a real truth

hidden in it:

"If I should die tonight

And you should come to my

cold corpse and say,

Weeping and heart-sick o'er my

lifeless clay—

If I should die tonight,

And you should come in deepest

grief and woe—

And say: "Here's that ten dol-

lars that I owe,"

I might arise in my large white

crayat

And say, "What's that?"

If I should die tonight

And you should come to my

cold corpse and kneel,

Clasping my bier to show the grief

—you feel,

I say, if I should die tonight

And you should come to me, and

there and then

Just even hint 'bout payin' me

that ten—

I might arise the while,

But I'd drop dead again."

Gas Merchants, Attention

Stock gambling in dull, uncertain times is most annoying to gamblers. They never can be quite sure.

Wall Street heard of the drought, and wise bulls said: "That will kill grain crops, and with less wheat and corn, prices will go up. Let us buy stocks and they will go up with wheat."

They bought stocks and they did not go up when wheat and corn went up.

The bears said: "This is our opportunity. We sympathize with the suffering public, especially the farmer. When drought kills crops, that will injure all the people, and stocks will go down. This is the time to sell them."

"They sold them and stocks did not go down enough to make it worth while."

Stock gambling is very wearisome, except for bulls, in good times, and for bears in panic. Then it is like taking candy from a sick child.

Captain Hawks, who stands out now as the greatest American flier, left New York at six o'clock in the morning, eastern daylight time, landed in Los Angeles at 50 minutes past 4:00 p.m. Pacific standard time, keeping an appointment to play golf at the edge of the Pacific, after leaving that morning the edge of the Atlantic.

His flying time, all in broad daylight, was less than fifteen hours, and he made five stops for gasoline. That will not be necessary in future days, with better machines and better fuel.

In "Continental United States" the population is 122,729,472. Uncle Sam says so. This does not include Porto Rico, the Philippines or Hawaii.

In ten years population has increased 16.1 per cent. If that increase continues, our population 100 years hence, in 2030, will be 546,095,925.

Labor union experts reading that will say, "There could never be jobs for so many." Workers said that 150 years ago, when our population was 5,000,000.

Farmers would greet the idea of 546,095,925 population with joy, exclaiming, "That would give us people enough to eat all our wheat and pay a good price for it."

Germany made a great fight while the war lasted, and has shown amazing powers of recuperation following the war, in spite of the Versailles treaty and the allied gold demands. You understand that when you read "Literacy in Berlin is only 60 per cent."

Of 28,000,000 books on the shelves of European libraries, the city of Berlin has 9,800,000, and all are serious books for students and research workers.

The highest rate of illiteracy is at Tehran, capital of Persia, 82 per cent unable to read or write.

News from India causes Mother Britain to feel safe. Mohammedans continue fighting and killing Hindus—12 killed, 150 injured, in the latest clash based on revenge.

For a wonder the world had turned, and a Hindu, son of a race ordinarily mild, shot and killed eleven Mohammedans and wounded four. That's like a sheep biting a wolf.

Such incidents take the Hindu mind off its grievances against Great Britain.

Unpleasant news from China. Nanjing dispatches tell of a British woman, wife of a British official, attacked while asleep by a Chinese soldier and expected to die of bayonet wounds.

Shanghai sends stories of torture and other outrages inflicted on women missionaries.

In Fukien province bandits kidnapped a woman missionary, cut off one of her fingers and sent it to the authorities, demanding \$50,000, threatening to send other fingers if the money was not paid.

David Belasco obliges Mr. Curtis by picking the "fifty greatest actors of all time," and many of them are now living—George M. Cohan, fifty-two; Mary Anderson, seventy-one; Minnie Maddern Fiske, sixty-one; Maude Adams, fifty-eight; Julia Marlowe, sixty-four. The ages are supplied by Mr. Belasco but those that have seen Cohan and the ladies can testify that at least twenty years should be taken from each.

The fact is that we have charming actors and actresses, but not "great" actors and actresses.

Rachel, born in Switzerland, daughter of a Jewish peddler, possessed genius that could not be extracted from all the American actresses that have ever lived.

Jean Tassaner, to prove that he loved a girl, wrote her a farewell note, jumped to his death from an airplane, his broken body landing in the garden of his mother's home.

Fools will make a hero of him. He would have been more like a hero had he taken care of his mother and lived to prove that he appreciated her, which is every man's first duty.

(A. 1918, by Miss Feature Syndicate, Inc.)

All Europe, Canada and Australia are complaining loudly of depression, and as soon as the Democratic national committee's publicity gets around to it the whole thing will be blamed on the extra-territorial effects of the new tariff law.

If President Hoover wants to learn on his vacation just how the country ought to be run, all he has to do is to slip into the Pullman smoking compartment and listen to the conversations for an hour or so.

Report of the Finance Committee To the President and members of the common council of the Village of Grayling:

Your committee on Finance, Claims and Accounts respectfully recommend that the accompanying bills be allowed as follows:

How long is a mile asks a western editor. Well it depends on whether it is a concrete or a dirt road.

OFFICIAL but unrevived census figures give the total population of continental United States as 122,729,472. The outlying possessions bring the grand total to 137,591,561, this including an estimate for the Philippines islands where an enumeration has not been made for several years. The proportions of population east and west of the Mississippi have shifted less than one-half of 1 per cent in ten years, being respectively 83.6 per cent and 30.4 per cent.

NEWS REVIEW OF CURRENT EVENTS

Huge Crop Losses Due to Drought Boost Prices and Raise Government.

By EDWARD W. PICKARD

PROTRACTED drought and excessively hot weather brought to the farmers of the United States a mixture of good and evil and aroused the administration to the consideration of relief measures beyond those contemplated by the act creating the federal farm board.

Both government and private crop reports led to estimates that the new corn crop had been damaged to the extent of at least \$60,000,000 bushels, and the rains that fell throughout much of the corn belt during the week were said to have come too late to have much influence on the yield since pollination had failed.

Private reports by one of the leading experts of the Middle West indicated that a large part of the crop was beyond any material recovery.

In Ohio the corn was deteriorating rapidly, and in southern Indiana it was badly damaged. In Illinois the

situation was at its worst in the southern part of the state. The crop in northern and western Kentucky was said to be entirely ruined, and the condition in Missouri and Iowa was not much better. Throughout the whole drought region, also, pastures and all fodder crops were burned up to an alarming extent.

On the other hand, these bad crop prospects led to a sensational rise in the prices of grain on the exchanges, and within a few days there was an estimated increase of about \$600,000,000 in the theoretical value of farmers' products. The market in Chicago went wild and corn led in the swift advance, followed by wheat and the other grains. For the first time in five years the public came in on big scale, and there were heavy buying orders from foreign countries. It was

suspected there would be a heavy sub-

sidy for corn as live stocks and, consequently, the demand for those

grains was large. Also the estimates of the Canadian wheat crop were slashed as a result of damage by drought, heat and black rust.

The yield of rye in Europe, exclusive of Russia, will be far below normal, and the Prussian oats crop is greatly reduced.

PRESIDENT HOOVER conferred with Secretary of Agriculture Hyde on plans for a government program to aid the farmers threatened with ruin by the drought, and he asked both Mr. Hyde and Chairman

Legge of the farm board to make recommendations within a few days. It was stated at the White House that the President had received prompt and favorable response to his appeal to railroad executives for cooperation in reducing rail rates for the emergency movement of live stock and feed

in the stricken areas.

The farm loan board said it was

willing to do all possible to extend

credit through the intermediate credit banks, the farm land banks and joint stock land banks. From congressional quarters came many requests for help, and to those was added the offer of Senator Robinson of Arkansas, the Democratic leader, to undertake

a refund by congress to the farm

board if the latter would divert all

"The measures of assistance that the farm board and the other agencies of the federal government can and should undertake are being determined," said Mr. Hoover. "It is too early to determine the precise character of relief; much depends upon the further spread of the drought; but no stone will be left unturned by the federal government in giving assistance to local authorities."

IN OTHER ways the drought had

serious results. There were nu-

merous destructive forest fires in

both the West and the East; the

milk shortage in many regions was

severe; and the water in the

Mississippi river was so low that

barges and towboats were stuck on

sandbars and mud flats all along the

Father of Waters. At the same time

the levels of Lakes Michigan, Super-

ior and Huron were higher; which

led commentators on the lake di-

version controversy to think that the

policy of the government has resulted

in giving the citizens who use the

Great Lakes more water than they

need; at the same time depriving the

manufacturers and farmers of the

Mississippi valley of sufficient wa-

ter to float their cargoes to the sea.

WHEAT prices and drought did

not have much effect on the Re-

publican primaries in Kansas as many

persons had expected. Gov. Clyde M. Reed, who sought to champion the cause of the farmers and severely criticised the policies of the federal

farm board, was defeated for renomina-

tion by Frank Hawke, farmer,

World war veteran, and former state

commander of the American Legion.

Senator Henry J. Allen, who was ap-

pointed by Governor Reed and is a

staunch supporter of the Hoover ad-

ministration, was nominated for the

Senate term ending in 1933, and Sen-

ator Capen was unopposed for re-

nomination for the long term.

On the Democratic ticket Harry H.

Wondring will oppose Hawke for the

governorship, and Jonathan M. Davis,

former governor, will try to defeat

Senators Capen.

STUBBORN CASE QUICKLY YIELDS TO NEW KONJOLA

New Compound Brings Long Sought Relief From Rheumatism And Other Ailments

MRS. ROSE GIZZO

"I am happy to have learned about this new medicine, Konjola, because in less than a month it has brought my health back to normal," said Mrs. Rose Gizzo, 444 Eagle street, Buffalo. "I suffered severely from rheumatism and often had headaches, backaches and heartburn. My appetite was poor and I lost a lot of weight. I was nervous and subject to frequent dizzy spells. This condition existed for about ten years until I gave Konjola a trial. The first bottle helped me and as I continued the treatment I am not troubled with rheumatism, headaches, or backaches. I have a wonderful appetite and have put on considerable weight. My nerves are much improved. I am still taking Konjola."

The files of Konjola are filled with just such happy expressions. Konjola, when taken systematically over a six to eight week period, has done for thousands what it did for Mrs. Gizzo.

Konjola is sold in Grayling, Mich., at the Mac & Gidley drug store and by all the best druggists in all towns throughout this entire section.

Inside Information

Carrots are a good source of vitamins, if quickly cooked or grated raw in a vegetable salad.

When making apple jelly flavor a few glasses with mint and add green coloring. This will be appetizing to serve with lamb.

The recent discovery of olives contain vitamin A suggests using them more frequently in the menu. Ripe olives are excellent when added to sandwich fillings.

Solid spruce-pulp filters and specially treated strawboard filters are used considerably in packing eggs for cold storage. These filters help to prevent the characteristic flavor of cold-storage eggs.

Sweetpotatoes, when properly dried, can be ground into a meal or flour which will last indefinitely and will keep the flavor when used in making pies and custards, according to the Bureau of Chemistry and Soils, U. S. Department of Agriculture. Sweetpotato flour, used with wheat flour, makes bread of good texture, color, and flavor, says the bureau.

French toast is an appetizing way

of using stale bread, and provides a main dish for breakfast, lunch or supper. Allow $\frac{1}{2}$ to $\frac{1}{4}$ cup of milk to 2 eggs. Beat the mixture; salt lightly, and dip slices of bread into it until well soaked. Fry in butter or well-seasoned fat in a heavy smooth skillet. Use moderate heat and let the toast become golden brown on one side before turning.

At the markets this fall you may find potatoes in handy size cotton bags of unique design. The Bureau of Home Economics of the U. S. Department of Agriculture, and the North Carolina Agricultural College developed this new "consumer package." One side of the bag is an open mesh fabric through which the buyer may inspect the size and quality of the potatoes. The other half of the bag is a close weave to display the producer's brand. The bag increases the incentive for growing good potatoes and marketing them as a graded product under a trade brand. The sacks also expand the market for potato crop.

To make white icing which never fails, put into a double boiler one cup of sugar, 4 tablespoons cold water, 1 egg-white, not beaten, and $\frac{1}{4}$ teaspoon of salt. Have the water in the lower part boiling. Commence beating the mixture at once with a Dover beater and beat constantly while it cooks for seven or eight minutes. It should then look just like ordinary boiled frosting and should be almost thick enough to spread. Take it from the stove, add $\frac{1}{4}$ teaspoon of vanilla and continue to beat about 5 minutes or until it has thickened.

Many people, particularly those who are acquainted with the use of honey in the granulated form, prefer granulated honey to liquid honey, and there is always a good market for the former, say apiculturists of the U. S. Department of Agriculture. Granulated honey can be used very much like butter, can be spread rapidly, and the stickiness, to which many people object, is obviated in this connection. Almost all honeys have a tendency to granulate after being removed from the hive. Alfalfa honey in particular granulates quickly after being extracted.

President Nicholas Murray Butler of Columbia University asks the American people to consider tele-

graphically the noble experiment in Russia, and its social production, the

attempt to kill most of the cattle

professors, and muscle the rest.

REPORT OF ANNUAL SCHOOL MEETING, SOUTH BRANCH TOWNSHIP

A REAL NUISANCE

With regard to conditions

such as they are throughout the

South Branch Township Unit School

District was held on July 14, in the

South Branch Town Hall at 10:00 a. m.

The meeting was called to order by Fred H. Hartman, President of the Board of Education. All members present.

Motion made by H. Schreiber, sup-

ported by L. Scott that A. Scott act

as second clerk of election. Motion carried.

Motion made by A. Scott, support-

ed by H. Schreiber, that L. Scott and J. Richardson act as inspectors

of posed upon by men and women, who

find a tale of woe more profitable

than hard work. Yet there seems to

be little reason for giving support to

peddlers. We have everything we

could possibly need available right

here in our local stores, and we know

that the man behind the counter is

also behind the merchandise that we

buy. We also know that he is going

to be right here where we can talk to

him in the event a purchase should

happen to turn out unsatisfactory.

If it is charity, we are called upon

to offer, then let us give it to the de-

serving—to those who really need

help. Unfortunately the people of

this class are usually too proud to

beg. A little study will show that

most of our kindly intentions lead to

nothing when they prompt us to help

beggars. For begging is now and al-

ways has been a profitable business

for those who know how to arouse

sympathy. Many, if not most, of

those persons you are perfectly justi-

fied in turning down the peddler and

the beggar who is able-bodied enough

to get his own living like you get

yourself by the sweat of the brow.

when taken systematically over a

six to eight week period, has done for

thousands what it did for Mrs. Gizzo.

MAKE IT PASS THREE GATES OF GOLD

If you are tempted to reveal a tale some one has told to you about another, make it pass; before you speak, three gates of gold. Three narrow gates, first, "Is it true?" Then, "Is it needful?" In your mind give truthful answer, and the next is last and narrowest, "Is it kind?" And if to reach your lips at last it passes through these gateways three, then you may tell nor ever fear what the result of speech may be.—Anonymous

Is it any wonder that owners of resort property often resent the encroachment of tourists and resorters upon their property. Only last week Conservation Officer Dutton and J. Burt Kiley had occasion to visit the American Legion camp ground at Higgins lake and there found how

some people appreciate the great outdoors. Not only had they left their camp ground in a frightful condition with rubbish scattered all over but had taken occasion to denude several beautiful birch trees of their bark. Several trees, eight and ten inches in diameter, were stripped of their bark for a height of ten feet, much of it being left on the ground as evidence of their thoughtlessness and vandalism. People who cannot refrain from destroying nature's beauty while on a pleasure and health giving trip should be rounded up by police officers and made to pay a severe penalty.—Roscommon Herald-News.

**For County
Road Commissioner**

I wish to announce to the voters of Crawford County that I am a candidate for the Republican nomination for County Road Commissioner at the September Primary and will appreciate your support. If elected I will work for the benefit of the county.

Yours truly,

Harry W. Souders
South Branch Township.

ANOTHER—**TRIUMPH!****INDIAN****Green Lite Gas**

A New High Speed Racing Gas at the Regular Price

Two-Day Special

To introduce this new idea in a high powered clean gasoline, we are making a Special Offer for SATURDAY and SUNDAY, AUGUST 16 and 17 of—

2 Quarts Havoline Oil with each 5 Gallons of Gas

If you do not need the oil at this special time, we will give you a ticket good for it, at any time.

Now, the refiners of the famous Indian Red Anti-Knock Gas and The New WaXfree Havoline Motor Oil bring you a third great triumph in refining: the new Indian Green-Lite Gasoline—a vastly improved high speed racing gas at no extra cost!

New Indian Green Lite is far better distilled than ordinary standard-priced fuels. It contains no back-firing parts to spit and sputter. It is what race drivers call an even burning gas—a fuel that delivers a tremendous "follow through" on the power-stroke, giving you instant get-away...soaring pick-up...flying speed...greater mileage.

This new and better green gas takes the place of the regular white Indian Gas you have been using, but sells at the same price. Try it today—and be gone when the green lights say "go!"

**HARD CORNS
SOFT CORNS**

Gone in 4 Days
Roots and All
Callouses Too

Out to stay out—selling like hot cakes in Great Britain and now in America—the pleasant, easy way to get rid of corns—a joyous, refreshing, invigorating foot bath for 3 or 4 nights and then lift out the corn roots and all.

They call this miracle worker Radox and since it has been working wonders with the bad feet of the tight little Isles—plasters and acids, antiseptics and skin destroying liquid belong to the dark ages.

It's the modern way—the sensible way to take out corns—to abolish callouses—to dissolve the hard skin from heels and toes and to put your feet in good vigorous condition so that you can walk and run and jump and dance with ease and pleasure.

Just ask for a box of Radox at the Mac & Gidley drug store or any modern drug store—you'll be delighted.

Still the situation is not without some consolation, even for the farmers, if the price of wheat is down, a bushel of it will still buy about as many gallons of gas as in the days before the war.

People who are too busy to take a vacation should learn from the lowly ant. Consider the ant. There is nothing busier than an ant, and yet it always finds time to go on picnics.

Judge.
